Denon's Globe Cruiser On-Ear Headphones are luxuriously finished and provide exquisite comfort and style. Featuring a 40mm driver, an integrated amplifier, AAC and aptX decoding for CD quality audio over a wireless connection, the design's control wheel also allows you to effortlessly control Apple® iPhone®, iPad™ or other Bluetooth devices. Incorporating advanced noise cancellation circuitry via Bluetooth® 3.0 wireless or a wired connection, Denon's Globe Cruiser headphones actively eliminate unwanted ambient noise, allowing you to fully immerse yourself in your music, wherever you are. Denon's pentagonal-shaped earpieces feature luxurious protein leather covers, detailed custom stitching and soft memory-foam cushions to alleviate pressure and prevent listening fatigue during extended listening. The headphones further feature a flat folding design housed in an executive leather bound travel case for ease of transport.

SOUNDS LIKE YOU

Eliminate external noise to create a haven of tranquility
Business professionals know that with all of the distractions one can encounter when travelling it's tough to keep focused. The AH-NCW500 On-Ear Headphones feature Denon's active noise cancellation circuitry that actively blocks external noise so you can keep your mind on work or catch up on some much needed rest.

Exceptional sound so you can feel the music like never before

Denon recently celebrated 100 years in the hi-fi industry, and such an amazing audio pedigree is clear from the moment you hear the AH-NCW500s. We know great-sounding music can be the best remedy for even the most hectic day of travel, and all Denon's Globe Cruiser On-Ear Headphones have been professionally tuned to provide the purest acoustics no matter what genre of music you listen to. Put on a pair of Globe Cruiser headphones, select favourite song and indulge your passion for great music. Globe Cruiser AH-NCW500 On-Ear Headphones have an integrated amplifier to provide superior performance and feature a 10 hour rechargeable battery.

DENON TRAVEL APP

- Denon Travel App, available for iPhone, iPad, or Android phones enhances the listening experience of the frequent traveler
- Allows you to load frequently-used travel apps for easy access
- Better quality audio player with instant playlist creation capability
- Ability to create, save and share custom EQ curves
- Choose a myriad of EQ presets
- Update your Facebook or Twitter status about the music you like with a touch of a button

FITS LIKE YOU

So comfortable, you may forget you're wearing them

We know a great pair of headphones is about sound and function, but we feel that it is also about fit. In a quest to provide the most comfortable, best fitting travel headphones, Denon's engineers have studied over 4,000 pairs of ears from people around the world, to come up with a design that automatically accounts for the subtle differences in ear shape, placement, ear canal size, and head size. We know that fit and comfort comes from paying attention to the smallest details. Denon's pentagonal shaped memory foam ear pads provide ultimate comfort for long trips, while our two-axis ear cup design and adjustable headband provide for a perfect, custom fit.

Pack Light

Denon's Globe Cruiser models are exceptionally portable enabling you to be able to pack light. The AH-NCW500 is engineered to fold flat into its protein leather carrying case. The case also features a detachable karabiner so you can opt to hook the case onto your briefcase or carry-on instead of taking up valuable space inside your bag. Accessories include a detachable audio cable (for times when wireless listening is not allowed), USB micro charging cable (for charging the battery), and an airline adapter.

MOVES LIKE YOU

Wireless, so you can move swiftly through the busiest airport or station

Tired of your traditional wired travel headphones restricting your movement? Denon's Globe Cruiser range of headphones include wireless Bluetooth® 3.0 connectivity models, so you can navigate through busy terminals and train stations without a tangle of wires slowing you down. Better still, Denon's Globe Cruiser headphones include both aptX and AAC decoding to provide CD quality sound over the Bluetooth wireless connection. A rechargeable battery provides 10 hours of listening enjoyment. Should the battery run out, you can still listen to music in passive mode. Simply connect the included detachable audio cable to continue listening to music.

Wired capability, for when wireless is not permitted

Your enjoyment of music doesn't have to stop when you board the plane and the flight attendant tells you to turn off all wireless devices. The Denon Globe Cruiser AH-NCW500 headphones feature a detachable audio cable connection, located under the right ear cup, to plug directly into any audio device.

Denon's control wheel provides wireless control, so you can keep your smartphone in your pocket, purse or briefcase

To make wireless audio even more convenient, we have incorporated wireless control of smartphones with the intuitive Denon control wheel, which mimics the operation of a conventional rotary control. To turn the volume up, simply rotate the right control wheel gently clockwise. Volume down? Rotate the right control wheel to the rear. Press the centre of the right control wheel to play/pause the music, and the centre of the left control wheel when you answer a telephone call. The Globe Cruiser On-Ear headphones also feature microphones to let you speak freely wherever you may be.
